

## Exchange Students for Master's Degree Programme Geomatics (EZ-Zulassung)

*Exchange students are international students who spend a part of their study program at HKA but graduate at their home university. The length of the stay amounts to 1 semester or 1 year. Sufficient language skills are a fundamental condition.*

If you are a student of one of our partner institutions you can be admitted as an exchange student (EZ-Zulassung) to our Master's Program Geomatics with the following requirements:

- You must send a **learning agreement** with your application. Contact your home university coordinator for the form, or download [here](#).  
*Students are expected to fill in the learning agreement. This agreement must be signed by themselves, their home university and the host institution. It is an informal contract that indicates precisely what lectures the student is going to study. It should be completed well before arriving at the host institution. Subsequent modifications are permitted as long as they are agreed with all parties concerned. At the end of the study period abroad, the host university will provide the exchange student as well as the home university with a report recording the results obtained in the agreed programme of study (transcript of records).*
- **Professional skills:**  
First academic degree or equivalent (BSc, BEng, Dipl.-Ing., Ing., ...) in Geomatics or related fields.  
If the exchange student has no first academic degree *and* his University does not offer the Bachelor-Master system, it is sufficient that the student has passed all exams of the third year at his home university. This allows to be admitted as "EZ-student".
- **Language skills:**  
Language of instruction is English. Students are asked to provide English language skills equivalent to level B2 of CEFR.

In order to apply as an exchange student, please use our online portal.

An exchange student admitted as "EZ-student" can not gain a Master's degree from our university; even if the student has enough credits as required for the Master's degree.

After the exam period (February / July) the exchange student receives a **transcript of records** with name of exams, German grades, credits and grades in ECTS.
