FOLLOW-UP WORKSHOP
Designing Higher Education across Institutional Boundaries

Speaker: Dr.-Ing. Ellen Fetzer / Dr. Thomas D'Souza

During the first part of this workshop, we will share good practice examples of transnational teaching and learning formats developed within the framework of ERASMUS+ projects. On that basis, participants will gain a shared understanding of possible models and concepts, including digital implementation modes.

The second part aims at facilitating a matching process of the workshop participants. We will identify shared interests, thematic fields and learning objectives as a basis for developing collaborative teaching and learning events. If time allows, we may already start conceptualising a transnational course design on the example of one of the potential topics identified by the group.
